

Together we keep industry mov-

About ENE Conveyor Belting

ENE Conveyor Belting Limited, a part of the ENE Group, has been providing conveyor belting solutions for over 25 years. With state-of-the-art facilities in both the UK and Ireland, we can provide bespoke belting solutions to various industries. Our fabricators and fitters have substantial experience within the industry and strive to provide a comprehensive solution to meet customer needs.

Along with conveyor belt manufacturing we provide a full fitting service which is tailored around our customer's production schedules, ensuring that work is completed in a timely manner and to the highest possible standards.

Plied Conveyor Belts

We hold a vast stock of plied conveyor belts allowing us to provide quick turnaround times. Our plied belts range from 1 ply to 3 ply with a variety of surface finishes including; fabric, rice grain, semi-elastic and diamond impression. These particular belts would be used for high frequency tasks for a wide variety of light to medium duty applications within food packaging, warehousing, re-cycling, agriculture and manufacturing industries. We can fabricate to your specification in house.

Solid PU Belts

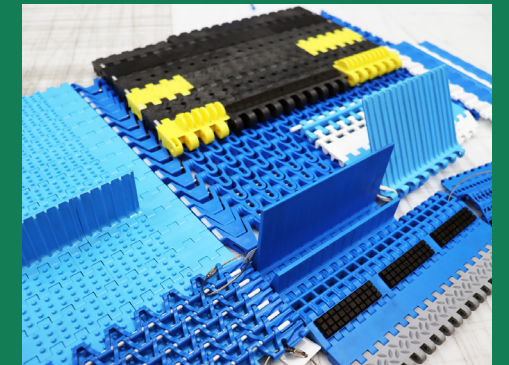

We offer a comprehensive range of Solid PU belts and are the largest stockist of Gates TPU food belts in Europe. Our Gates belts are embedded with aramid tension members which stabilises the belt. This property minimises stretch and distortion on the belt when in use. This ensures our belts last longer than conventional monolithic belts. These belts are Primarily used in the food and Pharmaceuticals industries.

We can custom manufacture any requirement to fit your specific needs.

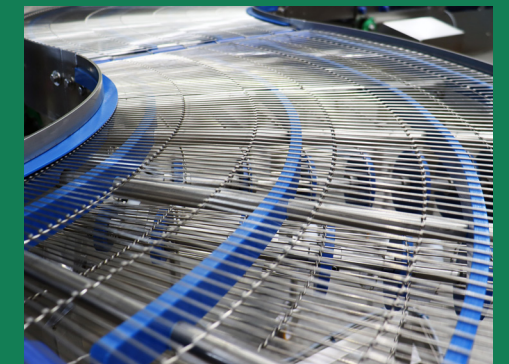

Modular Belts

We provide a range of modular belts in many sizes for use in straight running, side flexing & spiral conveyors. Our modular belts are rot resistant, durable and FDA compliant as well as being easily cleaned. We have a vast range of materials which are used for our modular belting such as; PE, PP, POM, and more for special applications. Providing cut resistance, heat resistance, high conductivity etc. For use in all industries.

Wire Belts

We can supply made to measure wire belts for use in the food, pharmaceutical and electronic industries. For use in extreme high and low temperature applications in ovens and freezers.

Flighted Sidewalled Belts

We have invested heavily in our capabilities to produce the best quality and widest range of options in flighted and side walled conveyor belts. Our flights and sidewalls range in height from 3mm up to 150mm, the width can be anything from 10mm up. We provide a range of flight types such as footed, narrow footed, baseless, vertical, inclined, cranked and many more along with different types of sidewalls such as sine wave, footed and baseless. Our flights and sidewalls can be provided in numerous materials such as FDA/EU & HACCP compliant along with PVC and PU types.

Timing Belts

We offer a vast range of timing belts sourced from manufactures who are specialists in natural rubber and plastic products. We pride ourselves in offering innovative solutions driven by customer demand. Our timing belts offered include; Synchrodlex, SynchroChain, HTD, Imperial, ContiCXP, VEE & Wedge, Roflex Garden, PolyVee, Flat Timing and PU Timing.

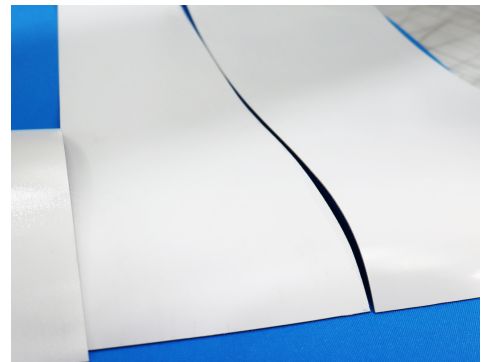

Transmission Belts

Poly cord round and V section, drive bands, drive tapes and belts for all industries including print and packaging applications.

FDA Compliant Belts

We understand the need for hygienic belting options and we provide an extensive range of belts which are FDA & HACCP compliant. These particular belt options are perfect for use within the food industry and pharmaceutical industry. Our options include; Solid PU, plied PVC and PU, silicone and modular belts.
