

Together we keep industry moving

About ENE Group

ENE Group, established in 1996, is headquartered in Banbridge, Co. Down. We have sites across the UK and EU providing solutions to the food and drinks industry along with the pharmaceutical industry. We are a leading manufacturer of stainless steel conveyor systems, stainless steel labelling systems and conveyor belts. With our qualified and experienced engineers, we provide tailor made and innovative solutions to cater for specific client needs.

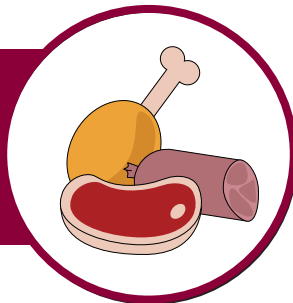

Worked with 90% of the top 10 food processing companies in Ireland over the past 3 years

*Irish Times

Worked with 60% of the 2021 top 10 meat processing companies in the UK

*OC&C top food & drink processors list 2021

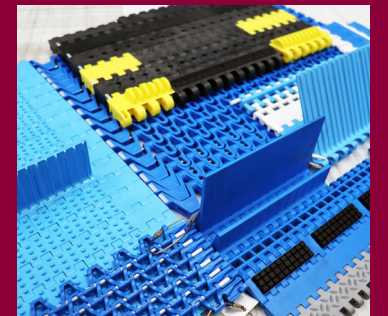

ENE Conveyor Systems

All ENE conveyor systems and machinery is designed and manufactured in-house by a team of qualified and experienced engineers committed to quality and performance. We offer bespoke machinery to meet individual customer and changing production requirements. All our conveyor systems are 304 grade stainless steel. We produce a wide variety of conveyor types that include; incline/decline, turn, vertical, merging/diverging, spiral cooling/freezing and many other conveyor types. ENE offers on-site consultation and advice based upon many years of conveyor design experience.

ENE Conveyor Belting

ENE is also a leading provider of conveyor belting and associated products. We provide conveyor belts such as; Plied Conveyor Belts, Modular Belts, Timing Belts and Gates TPU.

Sovereign Labelling Machines

Part of the ENE Group, Sovereign Labelling Machines manufactures bespoke and innovative labelling equipment for the food, beverage and pharmaceutical industry. Equipped with the latest CNC laser cutting, milling, turning and punching machinery, we provide clients with a comprehensive range from conveying, labelling and sleeving to robotic handling spanning from small units to complete production lines.

Ambit Engineering Projects

Ambit Engineering Projects became part of the ENE Group in 2020 providing further manufacturing capability, expertise and knowledge in the manufacture of stainless steel food handling, food preparation and food processing equipment.
